

Presidents report, 8th September 2025

We've been discussing lately how the computer club has changed over the years majority of people no longer use the laptops but concentrate on iPads tablets and phones so the tuition is needed to support those items.

Technology taking over the world so we constantly have to update on how to do the everyday things the special classes which we were going to have first Monday of each month are now fitting into when we can get a guest speaker and the knowledge to help us in every day life. I'm very happy with the members the friendship and the progress that we are making each week. thankThank you Fay.

We will have our Quarterly Meeting for the club members on Monday 20th October,
